A LETTER FROM FIRE CHIEF BUTTRON

Dear Property Owners & Tenants:

On March 27, 2019 the Nevada City City Council amended Chapter 8.10 of the Nevada City Municipal Code regarding Fire Control Regulations. The Nevada City Fire Department is reminding property owners, occupants, or persons in control of any private land, improved or unimproved, within the City to abate all weeds, flammable vegetation and other combustible materials that constitute a fire hazard. Please refer to Title 8, Chapter 8.10 of the Nevada City Municipal Code Establishing Miscellaneous Fire Control Regulations.

We are asking properties to be brought into full compliance and maintained as per timeframes and guidelines of Chapter 8.10, in particular, sections:

- **8.10.030** – Duty to abate flammable vegetation and combustible material by June 1; and
- 8.10.040** – Emergency vehicle access.

PLEASE NOTE: Section 8.10.030 requires property owners to complete initial abatement before **June 1st, 2019** and maintain such abatement through the fire season as declared by Cal Fire.

If a property owner fails to abate fire hazards on his or her property as specified in Chapter 8.10, the City may abate the hazardous vegetation and assess the cost of such abatement on the property, and such costs will constitute a lien upon the land until paid and will be collected on the next tax roll upon which real property taxes are collected.

We appreciate your diligence in keeping our community fire safe.

If we may be of assistance, please contact the Nevada City Fire Department at (530) 265-2351.

SEWER SMOKE TESTING

The City of Nevada City will be smoke testing the sewer collection system CITYWIDE this year on the week of May 20th, 2019. This project is being done in an effort to limit the cost of sewage treatment plant expansions that will be necessary over the next few years. The smoke testing will start in the downtown area around the area of Commercial Street and Broad St. and will work South towards the center of town. The smoke testing is an integral part of this maintenance program aimed at reducing rainwa-

ter and ground water infiltrating the sewers. The smoke will escape through cracks, breaks, storm water tie-ins such as rain leaders, and uncapped clean-outs. The Smoke is not toxic and will not harm anyone but occasionally smoke will come out of drains in houses that are not piped properly. If this happens at your house or business we suggest you contact a plumber to fix the problem as soon as possible because if the smoke gets in your house so will sewer gases which could be toxic or explosive

if the right conditions exist. Once we get going and find out how long it is going to take us for each section we will be able to inform the public more closely the area where we will be working.

If there are **questions** please direct them to **Bubba Highsmith at (530) 265-2496 ext. 148** as asking the crew will only slow them down and prolong the project. Thank you in advance for your cooperation.

your email address to be in-
cluded on email updates.

FIRE EVACUATION DRILL

On May 19th Cal Fire and
other Fire Departments will be
working with multiple neigh-

borhoods to complete a prac-
tice fire evacuation. The stag-
ing area will be at the Rood

Center on Hwy. 49. Do not be
alarmed by this activity as it is
only a drill.
